**Tablet Tip:** Clinical Checklists ⇒ Step 3: BTI Try-In Checklist and WTI Try-In Checklist  
⇒ Download the BTI Checklist to use with the patient case.

Complete ☐

---

### Next Steps:

1. Once you have completed the self-study training, you are prepared to work with your laboratory on your cases. We recommend you select a single-arch case to start. Discuss the case in advance with your laboratory. Select an achievable case, not a special requirement case, to make your first digital denture attainable. While not mandatory, we encourage you to document your digital dentures patient cases with photos from each patient visit. (No more than 2 photos from each of the 4 patient visits) We would like to add documented cases to this educational portal to illustrate the process for other customers. If you would like to send case photos, please email them to: DSDigitalDentures@dentsplysirona.com. Any digital format is accepted, however high resolution photos are the norm for publication. No photos will be accepted without prior consent of your patient. Please have the patient sign the release form. Please email consent form along with any photos.
2. Upon successful completion of the above steps, please email: DSDigitalDentures@dentsplysirona.com. Dentsply Sirona will provide you a link to take a 25 (multiple choice) exam. We will contact you directly with your results.
