

Digital Preview Checklist

Anterior Esthetics

- ☐ Midline (in relation to reference and opposing teeth)
- ☐ Tooth size and shape (correct mould selection)
- ☐ Anterior arrangement
- ☐ Irregular setup (rotated teeth age appropriate)
- ☐ Straight setup (perfect smile)
- ☐ Long axis of anteriors (centrals parallel)
- ☐ Anterior relationship (overbite/overjet/anterior contact)
- ☐ Incisal edge position (smile line) in relation to reference
- ☐ Maxillary and mandibular anteriors are not set labial to vestibule
- ☐ Maxillary anterior facial surface is 7-9mm from center of incisive papilla

Functional Occlusion

- ☐ Evaluate desired occlusal scheme
- ☐ Anatomical
- ☐ Semi-Anatomical
- ☐ Lingualized
- ☐ Flat
- ☐ Plane of occlusion (line from tip of canine to retromolar pad)
- ☐ Posterior occlusal contact for desired occlusal scheme
- ☐ Pounds line (medial of retromolar pad to mesial incisal angle of canine)

Gingival Base Trim and Contours

- ☐ Peripheral border thickness and extensions (vertical and horizontal dimension)
- ☐ Peripheral border trim (check reference for impression)
- ☐ Anatomical landmarks have been captured in base
- ☐ Posterior palatal seal
- ☐ Gingival margins
- ☐ Interdental papillae
